# MEMORANDUM

**TO:** FILE

**FROM:** WHALEN TOY  
Water Resources Control Engineer  
Data Management Unit - Statement Program  
Division of Water Rights

**DATE:** May 25, 2007

**SUBJECT:** UNDELIVERED SUPPLEMENTAL STATEMENT OF WATER  
DIVERSION AND USE (STATEMENT) S010900.

The U. S. Postal Service returned Supplemental Statement S010900 to the Division of Water Rights (Division) as "*not deliverable as addressed, unable to forward.*" Division staff subsequently used Parcel Quest™ and/or 411Locate™ on-line services in an attempt to identify current ownership of the diversion property, but were unsuccessful.

The water diverter is responsible for keeping the Division informed of any address or ownership changes. Because Division staff was unable to verify current ownership, S010900 has been designated as an inactive diversion, and has been coded as such in the Division's database. Unless notified by the current owner(s) or their agent, the Division will no longer issue a Supplemental Statement for S010900.

Attachment: Supplemental Statement  
Returned Envelope

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

## **TO ALL WATER USERS FILING SUPPLEMENTAL STATEMENTS OF WATER DIVERSION AND USE MARCH 2007**

Enclosed is your Supplemental Statement of Water Diversion and Use form (Supplemental Statement) for the years **2004, 2005, and 2006**. All Supplemental Statements should be completed and postmarked no later than **JULY 1, 2007** for delivery to the State Water Resources Control Board, Division of Water Rights (Division). Please review the information in the upper half of the enclosed Supplemental Statement(s) and make any corrections or additions in red ink or pencil (e.g., corrections to current ownership, address, phone number, agent, etc.) so that the Division's database record(s) can be updated.

A separate Statement of Water Diversion and Use form is required for each point of diversion. If the location of the existing point of diversion, as identified on the Supplemental Statement form, has changed, please identify the new location. However, if you have developed a new point of diversion, in addition to the existing point of diversion, please contact the Division for a separate form to record the new diversion.

If you do not file a Supplemental Statement, your use will be considered inactive and it will be recorded as such in the Division's database, and the Division will no longer mail you Supplemental Statements. If you wish to reactivate an inactive Statement in order to record your diversion and use of water, please contact the Division.

If you have any questions or need assistance, please contact me at (916) 341-5376 or at [brigby@waterboards.ca.gov](mailto:brigby@waterboards.ca.gov).

March 20<sup>th</sup> 1995  
2105 Waterford Road  
Sacramento, Calif  
95815-4135

Mary and I had our lawyer draw up  
our will to give all our property, assets etc,  
upon our deaths to our two sons, Neal  
Scott Jones and Alan B. Jones. Our property  
on Lavezzola Ranch (parcel # 008-010-018-0)  
has been Neal's and Alan's name plus Mary's  
name and mine listed. I did it this way  
to avoid paying an inheritance tax upon  
mine and Mary's death.

My tax bill currently comes to me,  
Emil B. Jones et al.

Emil B. Jones

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☒ Gallons  
☐ Acre-feet  
☐ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988	0	0	0	2000	8000	8000	8000	8000	6000	1500	100	0	41,600 GAL.
1989	11	11	11	11	11	11	11	11	11	11	11	11	11
1990	11	11	11	11	11	11	11	11	11	11	11	11	11

As nearly as I can determine I use the same amt. each year.

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation family garden (20'x50'), 3 apple trees, 2 evergreen trees

Stockwatering none

Domestic bathroom + kitchen, flowers, shrubs

Other (specify) swimming pool (15'x4') 5000 gals.

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

I had to have my original pump repaired (new seals + impeller) and I plan to move my intake about 5 ft to improve the flow through the same pipe diameter.

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

none
